In Action

When in the process of acquiring a new subsidiary, due diligence can become cumbersome as you review the subsidiary’s contracts to assess potential risks. During review, you may discover contracts with post-termination obligations such as confidentiality clauses, non-compete clauses, and restrictions on the use of confidential information.

However, the contracts are lengthy and complex and manual review would be a nightmare in identifying all the post-termination obligations. To automate review, LinkSquares offers 3 new Smart Values so you can quickly identify these obligations and how long they are in effect for.
